THE NARRATIVE

Melodic intention meets improvisational ritual.

With *Summer Circle*, guitarist and composer Aaron Summerfield presents a suite of works that balance improvisational rigor with a compelling melodic accessibility. Recorded in an intimate setting that prioritizes the natural resonance of the ensemble, the album serves as a meditation on cyclical time and the rituals of seasonal change.

Always searching for new musical directions, with this project Summerfield focuses on narrative architecture—each composition builds a distinct world, anchored by his grounded, thoughtful guitar work. It is an album that speaks to philosophical inquiry through the lens of group interaction, resulting in a sound that is as intellectually confident as it is emotionally inviting.

"This project is about finding the space where structured intent meets the spontaneity of the moment—capturing the feeling of a season returning, yet always appearing new."
